- ① Fuji and Tsugaru
- ② Fuji and Jonah Gold
- ③ Tsugaru and Orin
- ④ Orin and Jonah Gold

IV 次の問1、および問2の会話文の(8)～(12)に入る最も適切なものを、①～④から一つ選び、その番号で答えなさい。

問1

Mother : Do you have homework this summer?
 Son : Yes, I do. Lots!
 Mother : How much have you done so far?
 Son : (8). I still have a science project to do, and lots of reading.
 Mother : Did you do all the math homework?
 Son : (9).
 Mother : You always were good at math! How about your English homework?
 Son : That was really hard, but I did most of it. I still have to do some reading.
 Mother : Well, you (10). A little everyday and you will be done.

- (8) ① I finished all of it
 ② I haven't started yet
 ③ I haven't finished the math and English homework
 ④ About half
- (9) ① No, not yet
 ② Yes, that was easy
 ③ Yes, it was really difficult
 ④ There was no math homework
- (10) ① have to do it quickly
 ② don't have much time
 ③ still have plenty of time
 ④ don't need to do that

問2

Mark : How did you do in the math exam last week?
 Tim : I got (11).
 Mark : Wow, that's really good!
 Tim : Really? I thought I was going to get 80%. My parents are (12) when I tell them.
 Mark : Really? My parents would be so pleased with me if I got that! I only got 65%.

- (11) ① 60%
 ② 65%
 ③ 75%
 ④ 100%
- (12) ① going to be so happy
 ② so excited
 ③ going to be so disappointed
 ④ going to America without me

V 次の説明文とそれに続くグラフの内容に合致するように、下の(13)～(17)の質問に対する答えとして最も適切なものを、①～④の中から一つ選び、その番号で答えなさい。

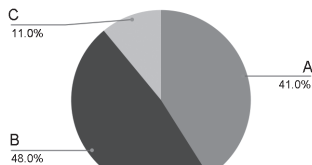

Home or University?

The last couple of years have been difficult ones for students. Most students around the world have had to study at home, away from their friends and teachers. We asked 500 students at our university how they felt about studying at home or at university. The majority of students said they prefer to study at university, and a small number said they were not sure. We then asked their main reason for this choice.

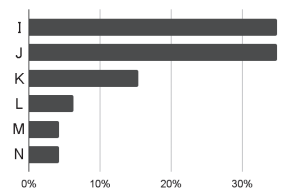

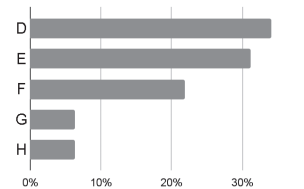

The two most common reasons for preferring to study at university were that it was easier to study and meet friends. Only 15% said that meeting teachers was their main reason for preferring to study at university, and only 4% said it meant they could go to the library. This was two percentage points less than the number of people who said it meant they didn't need to use a computer all the time.

The two most common reasons for preferring to study at home were that there was no need to travel, followed by being able to study in your own time. 22% also found that it gave them more free time. Only 6% said it meant they had more time to study, the same as the number of people who said it gave them more time to do part-time jobs.

From this, we can see that studying at university is easier for many students, and that university social life is also very important for them too. At the same time, many students liked the freedom of studying at home and the extra time it gave them. As life goes back to normal, we will have to think about how we can make studying easier and more convenient for all our students. The university must do what it can to make it safe for students to meet their friends and develop their social skills.

Do you prefer to study at home or university?

- (13) What is the correct order for the letters A to C in the pie chart?
 ① university, home, not sure
 ② home, university, not sure
 ③ university, not sure, home
 ④ There is not enough information to know the correct order.
- (14) What were the most popular reasons for studying at university?
 ① no need to travel and more free time
 ② don't need to use a computer and meet friends
 ③ easier to study and meet friends
 ④ meet friends and meet teachers

(15) What was the most popular reason for studying at home?
 ① studying in your own time
 ② can do part-time job
 ③ more time to study
 ④ no need to travel

(16) What does the letter K represent?
 ① meet teachers
 ② don't use a computer
 ③ more free time
 ④ can go to the library

(17) What does the article say it is important for the university to do?
 ① make it easier and safer to travel to university
 ② make it easier and safer to meet friends
 ③ give the students more freedom
 ④ make it easier to study at home

VI 次の英文を読み、後の問いに答えなさい。

On the 4th of February 1912, Franz Reichelt jumped off the Eiffel Tower in Paris, with a small crowd and about thirty journalists watching from below. This was not an attempt at suicide, and Reichelt hoped to land safely and become world famous.

Reichelt was a tailor and inventor who had a dream. He hoped to make a suit that could hide a (18) light-weight parachute. (20) were the latest exciting invention, and he was hoping to win a 10,000 franc prize - a huge amount of money at the time - and also be able to sell his invention around the world. It was less than ten years after the Wright brothers first successful flight. Although huge advances had been made, many pilots died in terrible crashes. There were demands to make the new industry safer and pilots wanted a parachute that could be used from a low flying plane.

He had tried out his invention by throwing shop mannequins ^{***} from his fifth floor apartment building. Sometimes it was successful, but not all of the time. He made adjustments to make it lighter, bigger, and faster. Many other people were also trying to (21) the prize, and some of them had large, rich companies helping them with their experiments. Reichelt felt the pressure.

He was (19) extremely confident in his invention and determined to prove how good it was to the world. He had to wait a year to get permission to use the Eiffel Tower, and only got it by saying he would use a mannequin. However, on the morning of the 4th, there were no mannequins to be seen. He had contacted journalists from all the top newspapers the day before, telling them that it would be him who would be wearing the suit and making the jump. A wave of excitement went through the crowd as, at 7 o'clock in the morning, he stepped out of his car wearing his invention, made a brief speech, and started up the Tower, hoping to make history.

It is not unknown for scientists and inventors to try out their experiments on themselves, although it is definitely not recommended. Marie Curie the two-time Nobel Prize winner would often test the effects of radiation on herself - and eventually died of cancer because of it. More (22), many scientists experimented on themselves in the hope of finding a vaccine for COVID-19.

Reichelt stood at the lowest platform of the Eiffel Tower, about 60 metres above the ground. His friends who had seen the broken mannequins from his earlier experiments tried to convince him not to make the jump. He waited 40 seconds with his foot on the edge before he jumped, perhaps thinking about becoming rich and famous, perhaps thinking about his death. He smiled as he jumped. Less than four seconds later, he lay dead at the bottom of the Eiffel Tower, his parachute only half open and wrapped around his broken body.

⑮ * parachute : パラシュート
 ** franc : フラン (当時のフランスの通貨単位)
 *** mannequin : マネキン

問1 下線部(18)light-weight および(19)extremely とほぼ同等の意味となる語句として最も適切なものを①～④の中から一つ選び、その番号で答えなさい。

(18) light-weight
 ① very heavy
 ② very bright
 ③ not heavy
 ④ not colorful

(19) extremely
 ① not
 ② very
 ③ crazy
 ④ a little

問2 文中の (20) (21) (22) に入る語句として最も適切なものを①～④の中から一つ選び、その番号で答えなさい。

(20) ① cars ② trains ③ airplanes ④ parachutes
 (21) ① steal ② win ③ have ④ lose
 (22) ① lately ② often ③ sometimes ④ recently

問3 本文の内容に合うように、次の(23)～(27)の質問の答えとして最も適切なものを、①～④の中から一つ選び、その番号で答えなさい。

(23) The fifth paragraph starts with the phrase "it is not unknown". What does this mean?
 ① It never happens.
 ② It is very common.
 ③ It happens but nobody knows about it.
 ④ It happens but it is not common.

(24) Which of these statements is NOT true?
 ① Many pilots were dying in airplane accidents.
 ② Scientists are not encouraged to experiment on themselves.
 ③ The people in charge of the Eiffel Tower didn't know he was going to jump.
 ④ Reinbert's friends all thought he would be successful.

- 11 -

(25) What was Reichelt hoping would happen?
 ① He hoped to kill himself.
 ② He hoped to fly.
 ③ He hoped to arrive safely on the ground.
 ④ He hoped to catch a plane flying low to the ground.

(26) How long did Reichelt take to fall to the ground?
 ① About one minute.
 ② Forty seconds.
 ③ 60 metres.
 ④ A few seconds.

(27) What is a good title for this passage?
 ① Suicide from the Eiffel Tower
 ② The story of a failed inventor
 ③ The story of a man who wanted to fly
 ④ Why inventors experiment on themselves
